ELENA PITSKHELAURI

Summary

Tbilisi, Georgia | pitskhelauri.elene@gmail.com | Github: Pitskhela | Linkedin: pitskhelaurielene

Mobile App Developer specializing in Flutter and native app development, with a solid understanding of the development cycle and a passion for creating user-friendly, high-quality apps. Experienced in web and backend development roles and very comfortable working in remote environments.

STACK

- **Primary:** Flutter, React Native, Java, Swift,
- **Secondary:** Kotlin, Objective C, React.js, Node.js, Angular, Express.js

WORK EXPERIENCE

ITD CORPORATION - BOSS MONEY APP

Mobile Application Developer (Remote | Full-time) | Nov 2021 - Ongoing

- Developed and maintained a money transfer service application using Flutter and React Native.
- Optimized application performance and responsiveness while collaborating with teams to integrate secure and reliable APIs.

Stack: *Flutter, React Native, Swift*

INDIE: SWIPE-BASED CASTING

Senior Frontend Developer (Remote | Part-time) | Jun 2020 - Sep 2022

- Developed a swipe-based casting app using Flutter.
- Designed intuitive and user-friendly UI/UX, receiving positive feedback for the design's clarity and navigability.
- Created the web version and landing page, ensuring consistent branding and user experience across platforms.

Stack: Flutter, React.js

REVENUE DEVELOPMENT FOUNDATION

Systems Engineer (Remote | Full-time) | Oct 2017 - Nov 2021

- Developed a native Android application and Website to optimize property tax systems.
- Extended software support and implemented new features for efficiently managing mineral cadastre systems for multiple foreign governments, using Web Grails and PostgreSQL.
- Executed the exportation of RESTful service with JWT authentication for Remop mobile, an Android application with open street maps integration, offline requests, and enhanced asset handling through Amazon S3.
- Innovated backend-managed Excel data sets and enhanced the NTR payments system for increased efficiency and scalability.

Stack: Java, Node.js, Swift, Angular, Grails, PostgreSQL

NO MACHINE

Frontend Developer (Remote | Part-time) | Jun 2019 - Jun 2020

- Contributed to the development of a cross-platform software application for remote access, desktop sharing, virtual desktop, and file transfer between computers, using Express.js.

Stack: Express.js

OPPA

Mobile Application Developer (Remote | Part-time) | Feb 2018 - March 2019

- Developed a money transfer application, focusing on Java for Android, ensuring smooth and secure transactions.
- Integrated various payment gateways and optimized user interface for enhanced user experience, and collaborated with backend teams for synchronized data flow between app and server.

Stack: Java

TERRA BANK

Mobile Application Developer (Remote | Full-time) | Aug 2016 - Sep 2017

- Developed an efficient banking application, using Java for Android and Swift for iOS platforms.
- Collaborated with various teams to implement new features and resolve issues, enhancing the overall functionality of the application.

Stack: *Java, Swift*
